

## Project : «Fil rouge»

**Purpose:** personal resume and portfolio

**Objective:** hybrid mobile app

**Development:** (required) angular2, ionic framework, apache cordova, node.js...

**Screen:** force in landscape format

### App:

This app contains 4 sections, accessible from «home» section:

- Personal information and skills
- Formation - a brief historic
- Portfolio - projects developed during this formation and other personal stuff
- Contact form

### 1/ Home page:

2 ways of navigation:

- navigation based on gyroscope information (more details on wireframe)
- or classic slide screen (on finger touch)

Background: looped picture + 2 or 3 overlapped graphic elements (parallax effect)

In a further version, the image could be replaced by the phone camera view (sort of augmented reality...)

### 2/ Sections:

classic navigation
